2. Po prejemu takega dovoljenja lahko prevoznik kadar koli prične opravljati dogovorjeni promet v celoti ali delno, pod pogojem, da izpolnjuje določila tega sporazuma in še posebej, da so tarife določene v skladu z določili 12. člena tega sporazuma.

2. Razen če je takojšnje ukrepanje nujno za preprečitev kršitve zakonov in predpisov, ki so navedeni zgoraj, bodo pravice, naštete v 1. odstavku tega člena, uporabljeni samo po posvetovanju s pristojnim organom druge pogodbenice v skladu s 16. členom tega sporazuma.

6. člen**Uporaba zakonov in predpisov**

1. Zakone in predpise ene pogodbenice, ki se nanašajo na prihod, zadrževanje in odhod z njenega ozemlja zrakoplovov, ki opravljajo mednarodno zračno plovbo ali na uporabo ali vodenje takih zrakoplovov, bo spoštoval določeni prevoznik druge pogodbenice pri vstopu na ozemlje, odhodu z ozemlja in medtem ko bodo na omenjenem ozemlju.

Each Contracting Party reserves the right, however, to refuse to recognize, for the purpose of flights above its own territory, certificates of competency and licences granted to its own nationals by the other Contracting Party.

Article 8

1. The Contracting Parties reaffirm that their obligation to protect, in their mutual relationship, the security of civil aviation against acts of unlawful interference forms an integral part of this Agreement.

2. The Contracting Parties shall provide upon request all necessary assistance to each other to prevent acts of unlawful seizure of aircraft and other unlawful acts against the safety of passengers, crew, aircraft, airports and air navigation facilities and any other threat to aviation security.

3. The Contracting Parties shall act in conformity with the provisions of the Convention on Offences and Certain Other Acts Committed on Board Aircraft, signed at Tokyo on 14 September 1963, the Convention for the Suppression of Unlawful Seizure of Aircraft, signed at The Hague on 16 December 1970 and the Convention for the Suppression of Acts against the Safety of Civil Aviation, signed at Montreal on 23 September 1971 and its supplementary Protocol for the Suppression of Unlawful Acts of Violence at Airports serving International Civil Aviation, signed at Montreal on 24 February 1988.

4. The Contracting Parties shall, in their mutual relations, act in conformity with the aviation security provisions established by the International Civil Aviation Organization and designated as annexes to the Convention on International Civil Aviation to the extent that such security provisions are applicable to the Parties; they shall require that operators of aircraft of their registry or operators who have their principal place of business or permanent residence in their territory and the operators of airports in their territory act in conformity with such aviation security provisions.

2. Zakoni in predpisi ene pogodbenice glede vstopa, carinskega postopka, tranzita, vseljevanja, potnih listov, carine, valute, sanitarnih predpisov in karantene bodo spoštovani s strani določenega prevoznika druge pogodbenice in s strani ali v imenu njegovih posadk, potnikov, tovora in pošte pri tranzitu, prihodu in odhodu in medtem ko bodo na ozemlju te pogodbenice.

Za potnike v tranzitu čez ozemlje ene in druge pogodbenice bo veljal samo poenostavljen nadzor.

3. Nobena pogodbenica ne bo dala svojemu ali kateremu koli drugemu prevozniku prednosti pred prevoznikom druge pogodbenice, ki opravlja podoben mednarodni zračni promet, pri uporabi svojih predpisov, navedenih v 1. in 2. odstavku tega člena, ali pri uporabi letališč, zračnih poti, služb zračnega prometa in drugih storitev, nad katerimi ima nadzor.

7. člen

Vsaka pogodbenica si pridržuje pravico, da za polete nad svojim ozemljem ne prizna spričeval o sposobnosti in dovoljenj, ki jih je njenim državljanom izdala druga pogodbenica.

8. člen

Varnost zračne plovbe

1. Pogodbenici ponovno potrjujeta, da je njuna medsebojna obveznost varovanja civilnega zračnega prometa pred nezakonitim vmešavanjem sestavni del tega sporazuma.

2. Pogodbenici si bosta na zahtevo medsebojno pomagali, da bi preprečili nezakonite ugrabitev zrakoplovov in druga nezakonita dejanja proti varnosti potnikov, posadke, zrakoplovov, letališč in navigacijskih naprav ter vsako drugo ogrožanje varnosti zračne plovbe.

3. Pogodbenici bosta ravnali v skladu z določili Konvencijo o kaznivih dejanjih in nekaterih drugih aktih, storjenih na letališčih, sprejete v Tokiu 14. septembra 1963, Konvencijo o zatiranju nezakonite ugrabitev zrakoplovov, sprejete v Haagu 16. decembra 1970, Konvencijo o zatiranju nezakonitih aktov zoper varnost civilnega letalstva, sprejete v Montrealu 23. septembra 1971, in njenega dopolnilnega Protokola o zatiranju nezakonitih nasilnih dejanj na letališčih za mednarodno civilno zrakoplovstvo, sprejetega v Montrealu 24. februarja 1988.

4. Pogodbenici bosta v medsebojnih odnosih ravnali v skladu z določili Mednarodne organizacije civilnega letalstva o varnosti zračne plovbe, ki so opredeljena v aneksih konvencije, v tisti meri, v kateri ta določila veljajo za obe pogodbenici; od letalskih družb, ki so vpisane v njunih registrih ali ki opravljajo pretežni del svojih dejavnosti ali imajo sedež na njunih ozemljih, ter od letaliških podjetij na njunih ozemljih bosta zahtevali, da delujejo v skladu s takimi varnostnimi predpisi.

5. Each Contracting Party agrees to observe the security provisions required by the other Contracting Party for entry into the territory of that other Contracting Party and to take adequate measures to inspect passengers, crew, their carry-on items as well as cargo prior to boarding or loading. Each Contracting Party shall also give positive consideration to any request from the other Contracting Party for special security measures for its aircraft or passengers to meet a particular threat.

6. When an incident or threat of an incident of unlawful seizure of aircraft or other unlawful acts against the safety of passengers, crew, aircraft, airports and air navigation facilities occurs, the Contracting Parties shall assist each other by facilitating communications and other appropriate measures intended to terminate rapidly and safely such incident or threat thereof.

7. Should a Contracting Party depart from the aviation security provisions of this article, the aeronautical authorities of the other Contracting Party may request immediate consultations with the aeronautical authorities of that Party. Failure to reach a satisfactory agreement within thirty (30) days will constitute grounds for application of Article 5 of this Agreement.

Article 9 User charges

1. Each Contracting Party may impose or permit to be imposed just and reasonable charges on the designated airline of the other Contracting Party. These charges shall be based on sound economic principles.

2. The charges imposed in the territory of one Contracting Party on the designated airline of the other Contracting Party for the use of airports and other aviation facilities by the aircraft of the designated airline of the other Contracting Party shall not be higher than those imposed on a national airline of the first Contracting Party engaged in similar international services.

3. Each Contracting Party shall encourage consultations between its competent charging authorities and the designated airline using the facilities and services, where practicable, through the airlines' representative organizations. Reasonable notice should be given of any proposal for changes in user charges to enable them to express their views before changes are made.

Article 10 Customs and Excise

1. Each Contracting Party shall exempt the designated airline of the other Contracting Party from import restrictions, customs duties, excise taxes, inspection fees and other national, regional or local duties and charges on aircraft, fuel, lubricating oils, consumable technical supplies, spare parts including engines, regular aircraft equipment, ground equipment, aircraft stores and other items intended for use or used solely in connection with the operation or servicing of aircraft of the designated airline of such other Contracting Party operating the agreed services, as well as printed ticket stock, airway bills, any printed material which bears the insignia of the company printed thereon and usual publicity material distributed without charge by that designated airline.

2. The exemptions granted by this article shall apply to the items referred to in paragraph 1 of this article, whether or not such items are used or consumed wholly within the territory of the Contracting Party granting the exemption, provided such items are:

5. Vsaka pogodbenica soglaša s tem, da bo spoštovala varnostne ukrepe, ki jih zahteva druga pogodbenica za vstop na svoje ozemlje, in da bo izvajala primerne ukrepe za pregled potnikov, posadke, njihove ročne prtljage kot tudi tovora pred vkrcanjem ali natovarjanjem. Vsaka pogodbenica bo z naklonjenostjo obravnavala vsako zahtevo druge pogodbenice za uvedbo razumnih dodatnih varnostnih ukrepov za njene zrakoplove ali potnike zaradi neposredne grožnje.

6. Ob nezakoniti ugrabitvi ali grožnji z ugrabitvijo oziroma drugih nezakonitih dejanjih zoper varnost potnikov, posadke, zrakoplovov, letališč ali navigacijskih naprav bosta pogodbenici pomagali druga drugi, s tem da bosta poskrbeli za komunikacije in druge ustrezne ukrepe, da bi se čim hitreje in varno končal tak incident ali grožnja.

7. Če ena od pogodbenic ne bo spoštovala določil o varnosti zračne plovbe iz tega odstavka, lahko pristojni organ druge pogodbenice zahteva takojšnje posvetovanje s pristojnim organom te pogodbenice. V kolikor v tridesetih (30) dneh ni dosežen zadovoljiv sporazum, je to razlog za uporabo 5. člena tega sporazuma.

9. člen Letališke takse

1. Vsaka pogodbenica lahko uvede ali dovoli, da se uvedejo upravičene in razumne takse za določenega prevoznika druge pogodbenice. Te takse bodo ekonomsko utemeljene.

2. Takse, ki bodo na ozemlju ene pogodbenice uvedene za določenega prevoznika druge pogodbenice za uporabo letališč in drugih naprav, ki jih bodo uporabljali zrakoplovi določenega prevoznika druge pogodbenice, ne bodo višje od tistih, ki bodo uvedene za domačega prevoznika prve pogodbenice, ki bo opravljal podoben mednarodni promet.

3. Pogodbenici bosta podpirali posvetovanja med svojimi organi, pristojnimi za določanje taks, in določenim prevoznikom, ki uporablja naprave in storitve, kadar koli bo mogoče preko organizacij predstavnikov prevoznikov. O vsakem predlogu spremembe taks bo dano primerno obvestilo, da bodo imeli možnost izraziti svoje mnenje, preden bodo takse spremenjene.

10. člen Carine in davki

1. Vsaka pogodbenica bo oprostila določenega prevoznika druge pogodbenice uvoznih omejitev, carin, davkov, inšpekcijskih taks in drugih državnih, regionalnih ali lokalnih dajatev in taks za zrakoplove, gorivo, maziva, potrošne tehnične zaloge, rezervne dele vključno z motorji, običajno opremo zrakoplovov, zemeljsko opremo, zaloge na zrakoplovu in druge predmete, ki so namenjeni za uporabo ali se porabijo samo v zvezi z uporabo ali servisiranjem zrakoplovov določenega prevoznika druge pogodbenice, ki opravlja dogovorjeni promet, kot tudi zaloge tiskanih vozovnic, letalskih tovornih listov, kataloga koli drugega tiskanega gradiva, z natisnjениm znakom podjetja in normalno reklamno gradivo, ki ga prevoznik brezplačno deli.

2. Oprostitve, dane v tem členu, bodo veljale za vse predmete, navedene v 1. odstavku tega člena, ne glede na to, ali bodo ti predmeti uporabljeni ali porabljeni v celoti na ozemlju pogodbenice, ki je oprostitev dala, pod pogojem, da so ti predmeti:

a) introduced into the territory of one Contracting Party by or on behalf of the designated airline of the other Contracting Party, but not alienated in the territory of the said Contracting Party;

b) retained on board aircraft of the designated airline of one Contracting Party upon arriving in or leaving the territory of the other Contracting Party;

c) taken on board aircraft of the designated airline of one Contracting Party in the territory of the other Contracting Party and intended for use in operating the agreed services.

3. The regular airborne equipment, the ground equipment, as well as the materials and supplies normally retained on board the aircraft of the designated airline of either Contracting Party, may be unloaded in the territory of the other Contracting Party only with the approval of the Customs authorities of that territory. In such case, they may be placed under the supervision of the said authorities up to such time as they are re-exported or otherwise disposed of in accordance with Customs regulations.

4. Baggage and cargo in direct transit shall be exempt from customs duties and other taxes.

5. The exemptions provided for by this article shall also be available where the designated airline of one Contracting Party has contracted with another airline, which similarly enjoys such exemptions from the other Contracting Party, for the loan or transfer in the territory of the other Contracting Party of the items specified in paragraph 1 of this article.

Article 11

Capacity

1. There shall be fair and equal opportunity for the designated airline of each Contracting Party to operate the agreed services between and beyond their respective territories on the routes specified in the Annex to this Agreement.

2. In operating the agreed services, the designated airline of each Contracting Party shall take into account the interest of the designated airline of the other Contracting Party so as not to affect unduly the services which the latter provides on the whole or part of the same route.

3. General note and explanation of line numbers

"C-E" denotes railway lines essentially identical to relevant E lines of the European Agreement of Main International Railway Lines (AGC) of 1985.

"C" denotes other lines important for international combined transport. "C" line numbers are identical to those of the nearest E line and are sometimes followed by a serial number.

The E number has been placed for easy reference and comparison with the lines contained in the AGC. It in no way indicates whether States are or intend to become Contracting Parties to the AGC.

** Symbols employed*

() = Station outside country concerned /for instance (Hendaye-)/

_____ = Alternative routes (for instance Avila
Arando de Duero)

----- = Section of an AGC line important for international combined transport (concerns only C-E lines)

..... = Section of line important for combined transport, but not part of the relevant AGC line (concerns only C-E lines).

Splošna opomba in pojasnilo k oznakam prog

"C-E" označuje železniške proge, ki so istovetne progam E Evropskega sporazuma o pomembnejših mednarodnih železniških progah (AGC) iz leta 1985.

"C" označuje druge pomembne proge za mednarodni kombinirani prevoz. Številke prog "C" so istovetne številкам najbližje proge E in jim včasih sledi serijska številka.

Oznaka E je namenjena za lažje razlikovanje in primerjavo s progami, ki so zajete v AGC. Oznaka vsekakor ne pomeni, da so države postale ali nameravajo postati pogodbenice v sporazumu AGC.

** Uporabljeni simboli*

() = postaja zunaj določenega ozemlja /npr. (Hendaye-)/

_____ = alternativne smeri (npr. Avila
Arando de Duero)

----- = odsek AGC proge, pomembne za mednarodni kombinirani prevoz (se nanaša le na proge C-E)

..... = odsek proge, pomembne za kombinirani prevoz, vendar ne del odgovarjajoče proge AGC (se nanaša le na C-E proge).

INTERNATIONAL COMBINED TRANSPORT LINES**

Preliminary remarks

The parameters are summarized in the table below. The values shown in column A of the table are to be regarded as important objectives to be reached in accordance with national railway development plans. Any divergence from these values should be regarded as exceptional.

Lines have been divided into two main categories:

(a) Existing lines, capable of being improved where appropriate; it is often difficult and sometimes impossible to modify, for instance, their geometrical characteristics, and the requirements have to be eased for such lines;

**TEHNIČNE KARAKTERISTIKE OMREŽIJ
POMEMBNIH MEDNARODNIH PROG
KOMBINIRANEGA TRANSPORTA**

Predhodne opombe

Parametri so povzeti v spodnji tabeli. Prikazane vrednosti v stolpcu A tabele predstavljajo pomemben cilj razvojnih načrtov nacionalnih železnic. Vsaka odstopanja od teh vrednosti so izjeme.

Proge so razdeljene v dve glavni kategoriji:

a) Obstojče proge, katere je možno izboljšati, kjer je to primerno; ker je pogosto težko in včasih nemogoče modificirati njihove geometrične karakteristike, se mora za te proge upoštevati olajšave.

(b) New lines to be built.

By analogy, the specifications given in the following table also apply, where appropriate, to ferry-boat services which are an integral part of the railway network.

INFRASTRUCTURE PARAMETERS FOR THE NETWORK OF IMPORTANT INTERNATIONAL COMBINED TRANSPORT LINES

| 7. Minimum useful siding length | 600 m | 750 m |
| | 750 m | |

¹⁾ Not of immediate relevance for combined transport, but recommended for efficient international combined transport.

²⁾ UIC: International Union of Railways.

³⁾ Minimum standards for combined transport trains (see annex IV).

Explanation of the parameters contained in the table above

1. Number of tracks

International combined transport lines must provide high capacity and allow for precise timing of operation.

It is generally possible to meet both requirements only on lines with at least two tracks; however, single track lines would be allowed if the other parameters of the Agreement are complied with.

2. Vehicle loading gauge

This is the minimum loading gauge for international combined transport lines.

On new lines, only a small marginal investment cost is normally incurred by adopting a high loading gauge, and the UIC C1 gauge has therefore been chosen.

The C1 gauge allows, for instance:

The transport of road goods vehicles and road trains (lorry with trailer, articulated vehicle, tractor and semi-trailer) conforming to the European road loading gauge (height 4 m, width 2.5 m) on special wagons with a loading height of 60 cm above rail level;

The transport of ordinary road semi-trailers 2.5 m wide and 4 m high on recess wagons with normal bogies;

The transport of ISO containers 2.44 m wide and 2.9 m high on ordinary flat wagons;

The transport of swap bodies 2.5 m wide on ordinary flat wagons;

The transport of containers/swap bodies 2.6 m wide and 2.9 m high on suitable wagons.

The existing lines across mountainous regions (such as the Pyrenees, Massif Central, Alps, Jura, Appenines, Carpathians) have many tunnels conforming to the Technical Unit loading gauge, or gauges of slightly greater height at the centre of the track. Increasing this to conform to the UIC C1 gauge is in almost all cases impossible from the economic and financial standpoints.

b) Nove proge za izgradnjo.

Specifikacije, navedene v sledeči tabeli, veljajo, kjer je to primerno, tudi za trajektne proge, ki so integralni del železniškega omrežja.

¹⁾ Se ne nanaša posebej na kombinirani transport, se pa priporoča za učinkovitejši mednarodni kombinirani transport.

²⁾ UIC: Mednarodna železniška zveza.

³⁾ Minimalni standardi za vlake v kombiniranem transportu (glej dodatek IV).

Pojasnilo parametrov, prikazanih v tabeli

1. Število tirov

Proge za mednarodni kombinirani transport morajo zagotavljati visoko zmogljivost in točnost vozneg reda.

Na splošno je to dvoje mogoče uresničevati le na vsaj dvotirnih progah; enotirne proge so lahko dovoljene, če so doseženi drugi parametri sporazuma.

2. Nakladalni profil

To je minimalni nakladalni profil za proge za mednarodni kombinirani prevoz.

Na novih progah se z uporabo visokega nakladalnega profila navadno samo neznatno povečajo investicijski stroški in se zaradi tega lahko izbere profil UIC C1.

Profil C1 na primer omogoča:

prevoz cestnih tovornih vozil in avtovlakov (tovornjak s prikolico, členkasto vozilo, vlačilec s polpriklonnikom) v skladu z evropskim cestnim nakladalnim profilom (višina 4 m, širina 2,5 m) na posebnih vagonih z nakladalno višino 60 cm nad zgornjim robom tŕnice;

prevoz navadnih cestnih polpriklonnikov širine 2,5 m in višine 4 m na žepastih vagonih z običajnimi podstavnimi vozički;

prevoz zabojnnikov ISO širine 2,44 m in višine 2,9 m na navadnih nizkopodnih vagonih;

prevoz zamenljivih tovorišč širine 2,5 m na navadnih nizkopodnih vagonih;

prevoz zabojnnikov/zamenljivih tovorišč širine 2,6 m in višine 2,9 m na primernih vagonih.

Na obstoječih progah čez gorate predele (npr. Pireneje, Centralni masiv, Alpe, Juro, Apenine, Karpati) je mnogo predorov, ki izpolnjujejo tehnične pogoje glede nakladalnih profilov ali profilov z nekoliko večjo višino v osi proge. Z gospodarskega in finančnega stališča je povečanje teh profilov, da bi bili v skladu s profilom UIC C1, skoraj v vseh primerih neupravičeno.

The UIC B gauge has therefore been chosen for these lines, as it allows, for instance:

The transport of ISO containers, 2.44 m wide and 2.90 m high, on flat container-wagons with a loading height 1.18 m above rail level;

The transport of swap bodies, 2.5 m wide and 2.6 m high on ordinary flat wagons (loading height 1.246 m);

The transport of semi-trailers on recess wagons;

The transport of containers/swap bodies, 2.6 m wide and 2.9 m high, on special low-loader wagons.

Most of the existing international combined transport lines offer at least the UIC B gauge. In the case of the others, improvement to this standard does not normally require major investments.

4. Nominal minimum speed

The nominal minimum speed determines the geometrical characteristics of the section (radius of curves and cant), the safety installations (braking distances) and the braking coefficient of the rolling stock.

5. Authorized mass per axle

This is the authorized mass per axle which international combined transport lines should be able to bear.

International combined transport lines should be capable of taking the most modern existing and future vehicle traffic, in particular:

Wagons with a mass per axle of 20 tonnes, which corresponds to UIC class C; a wagon mass per axle of 22.5 tonnes up to 100 km/h has been adopted, in conformity with recent UIC decisions. The mass per axle limits of 20 tonnes for a speed of 120 km/h are those set by the UIC regulations.

The mass per axle values shown are for a wheel diameter of not less than 840 mm, in accordance with the UIC regulations.

7. Minimum useful siding length

The minimum useful siding length on international combined transport lines is significant for combined transport trains (see annex IV).

Annex IV

PERFORMANCE PARAMETERS OF TRAINS AND MINIMUM INFRASTRUCTURE STANDARDS

A. Requirements for efficient international combined transport services

1. In order to be able to guarantee an efficient and expeditious flow of transport, necessitated by modern methods of production and distribution of goods, international combined transport services should fulfil in particular the following requirements:

(a) departure/arrival in line with customers' requests (in particular late closing times for loading and early placing at disposal of goods), regular services;

(b) short duration of door-to-door transport, high punctuality record, reliable transport times;

(c) reliable and timely information on the transport procedure, simple documentation, low risk of damage;

(d) capability of carrying all types of standard containers and of all loading units that can be carried in international European road haulage. In this context, the foreseeable developments regarding weights and dimensions of loading units have to be taken into consideration.

2. These requirements should be fulfilled through:

(a) high transport speed (measured from the place of departure to the place of destination, including all stops), which should be about the same, or possibly exceed that of end-to-end transport by road;

Zaradi omenjenega je bil za te proge izbran profil UIC B, ki, na primer, omogoča:

- prevoz zabožnikov ISO širine 2,44 m in višine 2,90 m, na nizkopodnih vagonih za zabožnike z nakladalno višino 1,18 m nad zgornjim robom tircic;

- prevoz zamenljivih tovorišč širine 2,5 m in višine 2,6 m na navadnih nizkopodnih vagonih (nakladalna višina 1,246 m);

- prevoz polpriklonikov na posebnih žepastih vagonih;

- prevoz zabožnikov/zamenljivih tovorišč širine 2,6 m in višine 2,9 m na posebnih nizkopodnih vagonih.

Na večini obstoječih prog za mednarodni kombinirani transport je vsaj profil UIC B. Pri drugih progah izboljšanje tega standarda običajno ne zahteva večjih naložb.

4. Najmanjša nazivna hitrost

Najmanjša nazivna hitrost določa geometrijske lastnosti preseka (polmer krivin in naklona), varnostne naprave (zavorne razdalje) in zavorni koeficient voznih sredstev.

5. Dovoljena osna obremenitev

To je osna obremenitev, ki so jo proge za mednarodni kombinirani transport sposobne prenesti.

Proge v mednarodnem kombiniranem prevozu morajo biti sposobne sprejemati naj sodobnejši obstoječi in prihodnji železniški transport, predvsem:

vagone z osno obremenitvijo 20 ton, ki ustreza kategoriji UIC C; osna obremenitev vagonov 22,5 tone pri 100 km/h je bila sprejeta v skladu z nedavnimi sklepi UIC-ja. Omejitve osne obremenitve 20 ton za hitrost 120 km/h so omejitve, določene s predpisi Mednarodne železniške zveze (UIC).

6. Najmanjša dolžina izogibališča

Najmanjša dolžina izogibališča na progah za mednarodni kombinirani transport je pomembna za vlake v kombiniranem prevozu (glej IV. dodatek).

Aneks IV

PARAMETRI ZMOGLJIVOSTI VLAKOV IN MINIMALNI INFRASTRUKTURNI NORMATIVI

A. Zahteve v zvezi z učinkovitostjo storitev v mednarodnem kombiniranem transportu

1. Da bi lahko zagotovile učinkovit in hiter prevoz, ki ga zahtevajo moderne tehnike proizvodnje in distribucije blaga, morajo storitve v mednarodnem kombiniranem transportu izpolnjevati predvsem naslednje zahteve:

(a) odhod/prihod, dogovorjen z zahtevami naročnikov (zlasti skrajni nakladalni časi in pravočasna dostava blaga), redne storitve;

(b) hiter prevoz od vrat do vrat, velika točnost, zanesljivost voznih redov;

(c) zanesljivo in pravočasno obveščanje o prevoznem postopku, enostavna dokumentacija, nizko tveganje škode;

(d) zmožnost prevažanja vseh vrst klasičnih zabožnikov in tovornih enot v mednarodnem evropskem cestnem transportu. Pri tem je treba upoštevati predvidljiv razvoj tež in velikosti transportnih enot.

2. Te zahteve bi morali izpolniti z:

(a) veliko transportno hitrostjo (merjeno od kraja odhoda do namembnega kraja skupaj z vsemi postanki), ki naj bi bila približno enaka ali po možnosti večja kot hitrost cestnega transporta od kraja do kraja;

(b) utilization of non-working hours of consignees (e. g. transport during the night), in order to be able to place the goods at the disposal in the morning hours as desired by the customers;

(c) suitable and sufficient equipment and infrastructure capacities (e. g. adequate loading gauges);

(d) direct trains, if possible (i. e. excluding or reducing to a minimum *en route* transfer of the consignments to other trains);

(e) organizational measures to improve the flow of transport by using modern telecommunication systems.

3. In order to meet the requirements described above, trains and infrastructure facilities should be of satisfactory efficiency, i. e. they should meet certain minimum standards that have to be complied with by all authorities concerned on a given transport relation.

4. The performance parameters and standards below have been established in particular for large international transport volumes, i. e. for transport relations with regular traffic of direct trains or with at least larger wagon groups. Single wagons or special transports could still be operated by conventional goods trains if this satisfies the needs of the customers and the railways concerned.

B. Performance parameters of trains

5. Trains used for international combined transport should meet the following minimum standards:

| Minimum standards | At present | Target values* |
|-----------------------|--------------|---|
| Nominal minimum speed | 100 km/h | 120 km/h |
| Length of train | 600 metres | 750 metres |
| Weight of train | 1 200 tonnes | 1 500 tonnes |
| Axle load (wagons) | 20 tonnes | 20 tonnes (22.5 tonnes at a speed of 100 km/h) |

*These values should be achieved approximately by the year 2000. They shall not exclude earlier achievement of higher standards as long as these do not impede the international development of combined transport.

If direct trains cannot be run, trains should, if possible, consist of only few wagon groups, the wagons in each group having the same destination. There should be no stops *en route* for operational reasons or frontier-crossing controls, if feasible.

6. Rolling stock shall meet the above standards relating to speed and axle load and shall be capable of carrying all those loading units which have to be taken into consideration in respect of weights and dimensions.

7. Trains of combined transport shall be rated as those with highest priority. Their timetable shall be designed so as to comply with customers requests for reliable and regular transport services.

C. Minimum standards for railway lines

8. Railway lines to be used for combined transport shall have an adequate train capacity per day, in order to avoid waiting times for trains of combined transport. These trains should not be delayed by non-working hours.

9. For the improvement of railway lines the infrastructure parameters contained in annex III shall be applicable.

D. Minimum standards for terminals

10. For the efficient handling of consignments in terminals the following requirements shall be met:

(b) koriščenjem nedelovnega časa pošiljateljev blaga (npr. prevoz ponoči), da bi blago lahko prispealo do prejemnika v jutranjih urah;

(c) primerno in zadostno opremo ter infrastrukturimi zmogljivostmi (npr. primernimi nakladalnimi profili);

(d) direktnimi vlaki, če je to mogoče (t.j. brez ali z minimalnim prekladanjem tovora na druge vlake *med potjo*);

(e) organizacijskimi ukrepi za izboljšanje pretoka blaga s pomočjo sodobnih telekomunikacijskih sistemov.

3. Da bi lahko izpolnili opisane zahteve, morajo biti vlaki in infrastrukturni objekti zadovoljive učinkovitosti, t.j. biti morajo v skladu z določenimi minimalnimi standardi, ki jih morajo upoštevati vsi pristojni organi na določeni progi.

4. Parametri in standardi zmogljivosti, opisani spodaj, so bili določeni predvsem za velike kompozicije v mednarodnem transportu, t.j. za prevoze z rednimi direktnimi vlaki ali vsaj večjimi vagonskimi sklopi. Posebne prevoze bi še vedno lahko opravljali s klasičnimi tovornimi vlaki, če to zadovoljuje potrebe naročnikov in železniških podjetij.

B. Parametri zmogljivosti vlakov

5. Vlaki, ki se uporabljajo v mednarodnem kombiniranem transportu, morajo izpolnjevati naslednje minimalne standarde:

| Minimalni standardi | Sedanje vrednosti | Načrtovane vrednosti* |
|---------------------------|-------------------|---|
| Nazivna najmanjša hitrost | 100 km/h | 120 km/h |
| Dolžina vlaka | 600 metrov | 750 metrov |
| Teža vlaka | 1200 ton | 1500 ton |
| Osna obremenitev (vagoni) | 20 ton | 20 ton (22,5 tone pri hitrosti 100 km/h) |

* Te vrednosti naj bi dosegli do leta 2000. Te vrednosti ne izključujejo zgodnejšega doseganja višjih standardov, če ti ne ovirajo mednarodnega razvoja kombiniranega prevoza.

Če prevoz ni mogoč z direktnimi vlaki, morajo biti vlaki, če je to mogoče, sestavljeni le iz nekaj vagonskih sklopov, vagoni v vsakem sklopu pa morajo biti namenjeni v isti namembni kraj. *Med potjo* se vlaki ne smejo ustavljati zaradi obratovalnih razlogov ali pri prehodu mej, če je to izvedljivo.

6. Železniška vozna sredstva morajo izpolnjevati standarde o hitrosti in osni obremenitvi in morajo biti sposobna prevažati vse tiste tovorne enote, ki jih je glede teže in velikosti treba upoštevati.

7. Vlaki v kombiniranem prevozu se štejejo za vlake z največjo prednostjo. Njihov vozni čas mora biti usklajen z zahtevami naročnikov glede zanesljivih in rednih storitev.

C. Minimalni standardi za železniške proge

8. Dnevna zmogljivost železniških prog, ki se uporabljajo za kombinirani transport, mora biti takšna, da vlačkom v kombiniranem transportu ne bo treba čakati. Njihova vožnja se ne sme zakasniti na račun ur počitka.

9. Za zboljšanje železniških prog veljajo infrastrukturni parametri, navedeni v III. dodatku.

D. Minimalni standardi za terminalne

10. Za učinkovito ravnanje s pošiljkami v terminalih morajo biti izpolnjene naslednje zahteve:

(a) The period from the latest time of acceptance of goods to the departure of trains, and from the arrival of trains to the availability of wagons ready for the unloading of loading units shall not exceed one hour, unless the wishes of customers regarding the latest time of acceptance or disposal of goods can be complied with by other means.

(b) The waiting periods for road vehicles delivering or collecting loading units shall be as short as possible (20 minutes maximum).

(c) The terminal site shall be selected in such a way that:

it is easily and quickly accessible by road from the economic centres;

within the rail network, it is well connected with long-distance lines and, for transport connections with wagon-group traffic, has good access to the fast freight trains of combined transport.

11. The minimum standards for intermediate stations stipulated below shall also relate to terminals.

E. Minimum standards for intermediate stations

12. Stops of trains of combined transport *en route*, necessary for technical or operational reasons, for example at wagon group exchange or gauge interchange stations, shall at the same time be used for carrying out work which otherwise would require additional stops (i.e. frontier controls, changing of the locomotive). The infrastructure of such intermediate stations shall comply with the following requirements:

Sufficient train capacity per day on feeder lines to avoid delays of trains in combined transport.

The entries and exits to and from the feeder lines shall allow the trains to filter in and out without delay. Their capacity shall be large enough to avoid delays of arriving and/or departing trains of combined transport.

Sufficient track capacity for the various types of track, as required for the specific work to be carried out in a station, in particular for arrival/departure track, train formation tracks, sorting lines and turn-out tracks, loading tracks and gauge interchange tracks.

The above-mentioned tracks shall have loading gauges that correspond to those of the railway lines to be used (UIC B or UIC C1).

The length of track shall be sufficient to accommodate complete trains of combined transport.

In the case of electric traction the tracks shall be accessible by electric tractive units (at frontier stations: to electric tractive units of the connecting railway concerned).

The capacity for trans-shipment, wagon group exchange, gauge interchange and frontier control shall guarantee that necessary stops can be made as short as possible.

(a) Stations for the exchange of wagon groups

13. Combined transport shall, if possible, be carried out by direct trains between the forwarding and the receiving stations. If this is not economical due to the low volume of consignments, and if the transfer of consignments of combined transport is therefore unavoidable, it should be done at least by wagon groups. Stop-over times to carry out these tasks shall not exceed 30 minutes each. This could be achieved by an appropriate formation of trains (which should run over as long distances as possible, also across borders) together with an adequate infrastructure of the wagon group exchange stations.

(a) Čas od zadnjega prejema blaga do odhoda vlakov in od prihoda vlakov do pripravljenosti vagonov za razkla- danje tovornih enot ne sme biti daljši od ene ure, razen če se želje naročnikov glede zadnje ure prejema ali izročitve blaga ne uskladijo kako drugače.

(b) Čakalna doba za cestna vozila, ki dostavljajo ali prevzemajo tovorne enote, mora biti čim krajša (največ 20 minut).

(c) Pri izbiri lokacije za terminal je treba upoštevati:

da je zlahka in hitro dostopna po cesti iz smeri gospodarskih središč;

da je znotraj železniškega omrežja dobro povezana s progami na velike razdalje in da ima, kar zadeva prevoze z vagonskimi kompozicijami, dober dostop do hitrih tovornih vlakov v kombiniranem prevozu.

11. Minimalni standardi za vmesne postaje se tudi nanašajo na terminale.

E. Minimalni standardi za vmesne postaje

12. Postanki vlakov v kombiniranem transportu *med potjo*, potrebni iz tehničnih ali operativnih razlogov, na primer na postajah ob zamenjavah vagonskih kompozicij ali sprememb širine kolotekov, se hkrati izkoristijo tudi za opravila, ki bi sicer zahtevala dodatno ustavljanje vlakov (t.j. mejni nadzor, zamenjava lokomotive). Infrastruktura vmesnih postaj mora biti v skladu z naslednjimi zahtevami:

Zadostna dnevna zmogljivost vlakov na dovoznih progah, da vlaki v kombiniranem transportu nimajo zamude.

Vstopi in izstopi na in z dovoznih prog morajo vlakom omogočati tekoče prehajanje. Njihova zmogljivost mora biti takšna, da vlaki v kombiniranem transportu pri prihodih oz. odhodih nimajo zamude.

Zadostna zmogljivost različnih vrst tirov, ki se zahaja za opravljanje posebnih del na teh postajah, zlasti tirov za prihode in odhode vlakov, tirov za sestavo vlakov, ranžirnih tirov in tirov za odklone v levo ali desno, nakladalnih tirov in tirov za spremembo širine kolotekov.

Omenjeni tiri morajo imeti nakladalne profile, ki so v skladu s profili uporabljenih železniških prog (UIC B ali UIC C1).

Dolžina tira mora biti tolikšna, da lahko sprejme celotni vlak v kombiniranem transportu.

Pri električni vleki morajo biti tiri dostopni za električne vlečne naprave (na mejnih postajah: električne vlečne naprave priključne železnice).

Zmogljivosti pretovarjanja, izmenjava vagonskih kompozicij, sprememba širine koloteka in mejni nadzor morajo zagotavljati čim krajše postanke vlakov.

(a) Postaje za izmenjavo vagonskih kompozicij

13. Kombinirani transport se, kolikor je mogoče, opravlja z direktnimi vlaki med odhodnimi in namembnimi postajami. Če to zaradi premajhnih pošiljk ni gospodarno in je pretovarjanje pošiljk zaradi tega neizogibno, naj se opravi vsaj po vagonskih kompozicijah. Postanki zaradi pretovarjanja ne smejo biti daljši od 30 minut. To se lahko doseže z ustrezeno sestavo vlakov (ki naj vozijo na kolikor mogoče dolgih razdaljah, tudi čez meje) in primerno infrastrukturo postaj za izmenjavo vagonskih kompozicij.

(b) *Border-crossing points*

14. Trains of combined transport shall run as far as possible all the way across borders to a station where the exchange of wagon groups is necessary in any case or to their final point of destination, without having to stop *en route*. There shall be, if possible, no stops at the border or, if unavoidable, only very short stops (of no more than 30 minutes). This shall be achieved:

by not carrying out work normally effected at the frontier or, if this is not possible, by shifting this work to inland places where the trains have to stop in any case for technical and/or administrative reasons;

by stopping only once, if at all, at joint border stations.

(c) *Gauge interchange stations*

15. To be able to fulfil future requirements, time saving and cost-effective procedures shall have to be developed. When transferring loading units to wagons of the other gauge, the requirements developed above for terminal trans-shipment shall be applied analogously. Stops at such gauge interchange stations should take as little time as possible. The available gauge interchange or transfer capacity shall be sufficient to guarantee short stops.

(d) *Ferry links/ports*

16. Transport services shall correspond with the ferry services offered. Stops at the ports for consignments in combined transport should be as short as possible (if possible not more than one hour). In addition to an appropriate infrastructure of the ferry port station and appropriate ferry boats (see paragraph 17 below) this shall be achieved by the following measures:

For necessary frontier control measures the requirements mentioned in paragraph 14 shall apply;

Timetables for ferries and railways should be co-ordinated and advance information to accelerate the loading of ships and/ or train formation shall be provided.

17. Ferry boats used for combined transport shall comply with the following requirements:

Appropriate sizes and types of vessels as required by the relevant loading units/goods wagons.

Quick loading and unloading of ferry boats and storage of loading units/wagons in accordance with the requirements of the subsequent carriage by rail (separation of combined transport from passenger and/or road transport, where appropriate).

If loading units stay on wagons during the crossing ferry boats shall be easily accessible, and time-consuming marshalling operations should not be necessary. Loading gauge, axle mass, etc. should comply with the line parameter described in annex III.

If the transfer of loading units has to be effected without wagons, the possibly necessary transport by road between ferry terminal and railway terminal should be characterized by short distances and good road connections.

(b) *Mejni prehodi*

14. Vlaki v kombiniranem transportu naj vozijo čim dlje čez mreje do postaje, na kateri je že tako treba zamenjati vagonske kompozicije, ali do končnega namembnega kraja brez ustavljanja *med potjo*. Če je to možno, naj se na mejah ne ustavlajo, če pa je to neizogibno, naj bodo postanki zelo kratki (največ 30 minut). To pa se doseže:

če se siceršnji postopki na mejah ne opravijo ali, kadar to ni možno, če se ti postopki opravijo v drugih krajih na ozemlju, kjer se morajo vlaki tako in tako ustaviti zaradi tehničnih oz. upravnih razlogov;

če se vlaki ustavijo le enkrat, če sploh, na skupnih mejnih postajah.

(c) *Postaje za spremembo širine koloteka*

15. Da bi lahko izpolnili prihodnje zahteve, je treba razviti postopke, ki so časovno in stroškovno ekonomični. Pri pretovarjanju tovornih enot na vagone z drugačnim kolotekom veljajo podobne zahteve kot za pretovarjanje na terminalih. Postanki na postajah za spremembo širine kolotekov naj bodo kolikor mogoče kratki, zato mora biti njihova zmogljivost takšna, da to omogoča, prav tako pa tudi zmogljivost pretovarjanja.

(d) *Trajektne povezave/pristanišča*

16. Prevozne storitve morajo ustrezi ponujenim trajektnim storitvam. Postanki v pristaniščih za tovore v kombiniranem prevozu naj bodo čim krajši (če je to mogoče, ne daljši kot eno uro). Da bi to dosegli, so poleg primerne infrastrukture trajektnega pristanišča in ustreznih ladij (glej spodnji 1. odstavek) potrebni še naslednji ukrepi:

za potrebne postopke mejnega nadzora veljajo zahteve, omenjene v 14. odstavku;

vozni redi za trajekte in vlake morajo biti usklajeni, zagotovljeno mora biti tudi vnaprejšnje obveščanje, da se pospeši nakladanje ladij oz. vlakovnih kompozicij.

17. Trajetki, ki se uporabljajo za kombinirani transport, morajo ustrezi naslednjim zahtevam:

primerna velikost in vrsta plovil, ki ustreza posameznim tovornim enotam/vagonom;

hitro nakladanje in razkladitev trajektor in skladiščenje transportnih enot/vagonov v skladu z zahtevami poznjšega železniškega transporta (ločevanje kombiniranega prevoza od potniškega oz. cestnega transporta, kjer je to ustrezeno);

če tovorne enote med plovbo ostanejo na vagonih, morajo biti trajekti zlahka dostopni, razne operacije manipuliranja, ki vzamejo veliko časa, pa opuščene. Nakladalni profil, osna obremenitev itd. morajo biti v skladu s parametri, opisanimi v III. dodatku.

Če se tovorne enote ne pretovarjajo na vagone, naj bo cestna razdalja med trajektnim in železniškim terminalom čim krajša, cestna povezava pa čim boljša.

The Ministry of Foreign Affairs of the Republic of Slovenia presents its compliments to the Embassy of the Republic of Chile and has the honour to propose a reciprocal abolition of visa requirements for holders of diplomatic, service and special passports on the following terms:

1. The nationals of the Republic of Slovenia and the nationals of the Republic of Chile who are holders of valid diplomatic, service and special passports may enter the territory of the Republic of Chile and the territory of the Republic of Slovenia, respectively without being required to obtain a visa.

2. The holders of above-mentioned passports may stay in the Slovenian or Chilean territory up to three months, with multiple entries.

3. The holders of diplomatic, service and special passports exercising functions as members of the respective diplomatic or consular missions may enter, stay in and leave the receiving State freely during the period of their assignment.

4. The abolition of visa requirements established by this Agreement shall not exempt the holders of the mentioned passports from the obligation to comply with the laws and regulations in force in the respective State with regard to entry, stay and exit.

5. Both Governments reserve the right discreetly to refuse permission of entry to a certain person whose presence in the State is considered inconvenient.

6. The present Agreement shall remain in force for an indefinite period. Either Contracting Party may terminate it with a three-month notice in writing through diplomatic channels.

If the above proposal is acceptable to the Government of the Republic of Chile, I have the honour to suggest that the present note and the note in reply shall constitute an Agreement between the two Governments on the abolition of visa requirements for holders of diplomatic, service and special passports which shall enter into force thirty days following the date of the note in reply.

NOTA VERBAL

La Embajada de Chile saluda muy atentamente al Ministerio de Relaciones Exteriores de la República de Eslovenia y tiene el honour de acusar recibo de su Nota N- 921-923-3930/94, de fecha 2 de junio de 1994, cuyo texto en idioma español es el siguiente:

Republika Slovenija
Ministrstvo za zunanje zadeve

Št.: 921-92-3930/94

Ministrstvo za zunanje zadeve Republike Slovenije izraža spoštovanje Veleposlaništvu Republike Čile in mu ima čast predlagati vzajemno odpravo vizumov za imetnike diplomatskih, službenih in posebnih potnih listov kot sledi:

Državljanji Republike Slovenije in državljanji Republike Čile, imetniki veljavnih diplomatskih, službenih in posebnih potnih listov lahko vstopijo na ozemlje Republike Čile in ozemlje Republike Slovenije brez obveznosti pridobitve vizuma.

2. Imetniki zgoraj omenjenih potnih listov lahko bivajo na slovenskem ali čilskem ozemlju do treh mesecev, s pravico večkratnega vstopa.

3. Imetniki diplomatskih, službenih in posebnih potnih listov, ki opravljajo funkcije članov diplomatskih in konzularnih misij, lahko prosto vstopijo, bivajo in izstopijo iz države sprejema, v času trajanja njihove misije.

4. Odprava vizumov, ustanovljena s tem sporazumom, ne oprišča imetnikov omenjenih potnih listov obveznosti, da spoštujejo veljavne zakone in predpise o vstopanju, bivanju in izstopanju iz zadevne države.

5. Obe vladi si pridržujeta diskrecijsko pravico, da ne dovolita vstopa tistim osebam, katerih prisotnost je v državi nezaželena.

6. Ta sporazum se sklene za nedoločen čas. Vsaka od pogodbenic ga lahko odpove s pisnim obvestilom po diplomatski poti, z odpovednim rokom treh mesecev.

Če je navedeni predlog za Vlado Republike Čile sprejemljiv, imam čast predlagati, da ta nota in nota-odgovor tvorita sporazum med vladama o odpravi vizumov za imetnike diplomatskih, službenih in posebnih potnih listov, ki začne veljati trideset dni po datumu note-odgovora.

Ministrstvo za zunanje zadeve Republike Slovenije ponovno izkorisča to priložnost, da Veleposlaništvo Republike Čile izrazi zagotovila svojega najglobljega spoštovanja.

VERBALNA NOTA

Veleposlaništvo Čila pozdravlja Ministrstvo za zunanje zadeve Republike Slovenije in ima čast potrditi prejem njegove note št.: 921-923-3930/94 z dne 2. junija 1994, katere vsebinā se v španščini glasi:

«El Ministerio de Relaciones Exteriores de la República de Eslovenia saluda muy atentamente a la Embajada de la República de Chile y tiene el honor de proponer la recíproca abolición del requisito de visa para los titulares de pasaportes diplomáticos, oficiales y especiales en los términos siguientes:

1) Los nacionales de la República de Eslovenia y de la República de Chile, titulares de pasaportes diplomáticos, oficiales y especiales válidos, podrán ingresar a los territorios de las Repúblicas de Chile y Eslovenia respectivamente, exentos del requisito de visa.

2) Los titulares de los pasaportes antes mencionados podrán permanecer hasta tres meses en el territorio esloveno o chileno, con reingresos múltiples.

3) Los titulares de pasaportes diplomáticos, oficiales y especiales que presten servicios como miembros de las respectivas misiones diplomáticas o consulares, podrán ingresar, permanecer y salir libremente del país receptor durante el periodo que dure su misión.

4) La supresión del requisito de visa establecido por el presente Acuerdo no exime a los titulares de dichos pasaportes de la observancia de las leyes y reglamentos en vigor relativas a la entrada, permanencia y salida de los respectivos países.

5) Ambos Gobiernos se reservan el derecho de permitir el ingreso en forma discrecional, cuando consideren inconveniente la entrada al país de una persona determinada.

6) El presente Acuerdo tendrá duración indefinida. Podrá ser denunciado por cualquiera de las partes mediante aviso por escrito, previo de tres meses, por la vía diplomática.

Si dicha proporción es aceptable para el Gobierno de Chile, me permito proponer que la presente Nota y la Nota en respuesta constituyan un Acuerdo entre ambos Gobiernos para la exención del requisito de visa para titulares de pasaportes diplomáticos, oficiales y especiales, que entrará en vigencia treinta días después de la fecha de la Nota de respuesta.

El Ministerio de Relaciones Exteriores de la República de Eslovenia hace propicia la oportunidad para reiterar a la Embajada de Chile las seguridades de su más alta y distinguida consideración.»

La Embajada de Chile tiene el agrado de confirmar que el contenido de dicha Nota es aceptable para el Gobierno de Chile como texto de un Acuerdo de Exención del requisito de visa en pasaportes diplomáticos, oficiales y especiales de ambos países.

La Embajada de Chile hace propicia la oportunidad para reiterar al Ministerio de Relaciones Exteriores de la República de Eslovenia las seguridades de su más alta y distinguida consideración.
