

BASEL CONVENTION

on the control of transboundary movements of hazardous wastes and their disposal

PREAMBLE

THE PARTIES TO THIS CONVENTION,

AWARE of the risk of damage to human health and the environment caused by hazardous wastes and other wastes and the transboundary movement thereof,

MINDFUL of the growing threat to human health and the environment posed by the increased generation and complexity, and the transboundary movement of hazardous wastes and other wastes,

MINDFUL ALSO that the most effective way of protecting human health and the environment from the dangers posed by such wastes is the reduction of their generation to a minimum in terms of quantity and/or hazard potential,

CONVINCED that States should take necessary measures to ensure that the management of hazardous wastes and other wastes including their transboundary movement and disposal is consistent with the protection of human health and the environment whatever the place of their disposal,

NOTING that States should ensure that the generator should carry out duties with regard to the transport and disposal of hazardous wastes and other wastes in a manner that is consistent with the protection of the environment, whatever the place of disposal,

FULLY RECOGNIZING that any State has the sovereign right to ban the entry or disposal of foreign hazardous wastes and other wastes in its territory,

RECOGNIZING ALSO the increasing desire for the prohibition of transboundary movements of hazardous wastes and their disposal in other States, especially developing countries,

CONVINCED that hazardous wastes and other wastes should, as far as is compatible with environmentally sound and efficient management, be disposed of in the State where they were generated,

AWARE ALSO that transboundary movements of such wastes from the State of their generation to any other State should be permitted only when conducted under conditions which do not endanger human health and the environment, and under conditions in conformity with the provisions of this Convention,

CONSIDERING that enhanced control of transboundary movement of hazardous wastes and other wastes will act as an incentive for their environmentally sound management and for the reduction of the volume of such transboundary movement,

CONVINCED that States should take measures for the proper exchange of information on and control of the transboundary movement of hazardous wastes and other wastes from and to those States,

NOTING that a number of international and regional agreements have addressed the issue of protection and preservation of the environment with regard to the transit of dangerous goods.

TAKING INTO ACCOUNT the Declaration of the United Nations Conference on the Human Environment (Stockholm, 1972), the Cairo Guidelines and Principles for the Environmentally Sound Management of Hazardous Wastes adopted by the Governing Council of the United Nations Environment Programme (UNEP) by decision 14/30 of 17 June 1987, the recommendations of the United Nations Committee of Experts on the Transport of Dangerous Goods (formulated in 1957 and updated biennially), relevant recommendations, declarations, instruments and regulations adopted within the United Nations system and the work and studies done within other international and regional organizations,

MINDFUL of the spirit, principles, aims and functions of the World Charter for Nature adopted by the General Assembly of the United Nations at its 37th session (1982) as the rule of ethics in respect of the protection of the human environment and the conservation of natural resources,

AFFIRMING that States are responsible for the fulfilment of their international obligations concerning the protection of human health and protection and preservation of the environment; and are liable in accordance with international law,

RECOGNIZING that in the case of a material breach of the provisions of this Convention or any protocol thereto the relevant international law of treaties shall apply,

AWARE of the need to continue the development and implementation of environmentally sound low-waste technologies, recycling options, good house-keeping and management systems with a view to reducing to a minimum the generation of hazardous wastes and other wastes,

AWARE ALSO of the growing international concern about the need for stringent control of transboundary movement of hazardous wastes and other wastes, and of the need as far as possible to reduce such movement to a minimum,

CONCERNED about the problem of illegal transboundary traffic in hazardous wastes and other wastes,

TAKING INTO ACCOUNT ALSO the limited capabilities of the developing countries to manage hazardous wastes and other wastes,

RECOGNIZING the need to promote the transfer of technology for the sound management of hazardous wastes and other wastes produced locally, particularly to the developing countries in accordance with the spirit of the Cairo Guidelines and decision 14/16 of the Governing Council of UNEP on promotion of the transfer of environmental protection technology,

RECOGNIZING ALSO that hazardous wastes and other wastes should be transported in accordance with relevant international conventions and recommendations,

CONVINCED ALSO that the transboundary movement of hazardous wastes and other wastes should be permitted only when the transport and the ultimate disposal of such wastes is environmentally sound,

DETERMINED to protect, by strict control, human health and the environment against the adverse effects which may result from the generation and management of hazardous wastes and other wastes,

HAVE AGREED AS FOLLOWS:

2. Each Party shall subsequently inform the Secretariat of any significant changes to the information it has provided pursuant to paragraph 1.
3. The Secretariat shall forthwith inform all Parties of the information it has received pursuant to paragraphs 1 and 2.
4. Parties shall be responsible for making the information transmitted to them by the Secretariat under paragraph 3 available to their exporters.

Article 4

General obligations

1. (a) Parties exercising their right to prohibit the import of hazardous wastes or other wastes for disposal shall inform the other Parties of their decision pursuant to Article 13.
- (b) Parties shall prohibit or shall not permit the export of hazardous wastes and other wastes to the Parties which have prohibited the import of such wastes, when notified pursuant to subparagraph (a).

- (c) Parties shall prohibit or shall not permit the export of hazardous wastes and other wastes if the State of import does not consent in writing to the specific import, in the case where that State of import has not prohibited the import of such wastes.
2. Each Party shall take the appropriate measures to:
- (a) ensure that the generation of hazardous wastes and other wastes within it is reduced to a minimum, taking into account social, technological and economic aspects;
 - (b) ensure the availability of adequate disposal facilities, for the environmentally sound management of hazardous wastes and other wastes, that shall be located, to the extent possible, within it, whatever the place of their disposal;
 - (c) ensure that persons involved in the management of hazardous wastes or other wastes within it, take such steps as are necessary to prevent pollution due to hazardous wastes and other wastes arising from such management and, if such pollution occurs, to minimize the consequences thereof for human health and the environment;
 - (d) ensure that the transboundary movement of hazardous wastes and other wastes is reduced to the minimum consistent with the environmentally sound and efficient management of such wastes, and is conducted in a manner which will protect human health and the environment against the adverse effects which may result from such movement;
 - (e) not allow the export of hazardous wastes or other wastes to a State or group of States belonging to an economic and/or political integration organization that are Parties, particularly developing countries, which have prohibited by their legislation all imports, or if it has reason to believe that the wastes in question will not be managed in an environmentally sound manner, according to criteria to be decided on by the Parties at their first meeting.

 - (g) prevent the import of hazardous wastes and other wastes if it has reason to believe that the wastes in question will not be managed in an environmentally sound manner;
 - (h) cooperate in activities with other Parties and interested organizations, directly and through the Secretariat, including the dissemination of information on the transboundary movement of hazardous wastes and other wastes, in order to improve the environmentally sound management of such wastes and to achieve the prevention of illegal traffic.

4. Each Party shall take appropriate legal, administrative and other measures to implement and enforce the provisions of this Convention, including measures to prevent and punish conduct in contravention of the Convention.

5. A Party shall not permit hazardous wastes or other wastes to be exported to a non-party or to be imported from a non-party.

6. The Parties agree not to allow the export of hazardous wastes or other wastes for disposal within the area south of 60° south latitude, whether or not such wastes are subject to transboundary movement.

7. Furthermore, each Party shall:

- (a) prohibit all persons under its national jurisdiction from transporting or disposing of hazardous wastes or other wastes unless such persons are authorized or allowed to perform such types of operations;

8. Each Party shall require that hazardous wastes or other wastes, to be exported, are managed in an environmentally sound manner in the State of import or elsewhere. Technical guidelines for the environmentally sound management of wastes subject to this Convention shall be decided by the Parties at their first meeting.

9. Parties shall take the appropriate measures to ensure that the transboundary movement of hazardous wastes and other wastes only be allowed if:

- (a) the State of export does not have the technical capacity and the necessary facilities, capacity or suitable disposal sites in order to dispose of the wastes in question in an environmentally sound and efficient manner; or
- (b) the wastes in question are required as a raw material for recycling or recovery industries in the State of import; or

(c) the transboundary movement in question is in accordance with other criteria to be decided by the Parties, provided those criteria do not differ from the objectives of this Convention.

11. Nothing in this Convention shall prevent a Party from imposing additional requirements that are consistent with the provisions of this Convention, and are in accordance with the rules of international law, in order better to protect human health and the environment.

12. Nothing in this Convention shall affect in any way the sovereignty of States over their territorial sea established in accordance with international law, and the sovereign rights and the jurisdiction which States have in their exclusive economic zones and their continental shelves in accordance with international law, and the exercise by ships and aircraft of all States of navigational rights and freedoms as provided for in international law and as reflected in relevant international instruments.

13. Parties shall undertake to review periodically the possibilities for the reduction of the amount and/or the pollution potential of hazardous wastes and other wastes which are exported to other States, in particular to developing countries.

Article 5

Designation of competent authorities and focal point

To facilitate the implementation of this Convention, the Parties shall:

1. designate or establish one or more competent authorities and one focal point. One competent authority shall be designated to receive the notification in case of a State of transit;
2. inform the Secretariat, within three months of the date of the entry into force of this Convention for them, which agencies they have designated as their focal point and their competent authorities;
3. inform the Secretariat, within one month of the date of decision, of any changes regarding the designation made by them under paragraph 2.

Article 6

Transboundary movement between Parties

1. The State of export shall notify, or shall require the generator or exporter to notify, in writing, through the

channel of the competent authority of the State of export, the competent authority of the States concerned of any proposed transboundary movement of hazardous wastes or other wastes. Such notification shall contain the declaration and information specified in Annex V, A, written in a language acceptable to the State of import. Only one notification need be sent to each State concerned.

2. The State of import shall respond to the notifier in writing, consenting to the movement with or without conditions, denying permission for the movement, or requesting additional information. A copy of the final response of the State of import shall be sent to the competent authorities of the States concerned which are Parties.

3. The State of export shall not allow the generator or exporter to commence the transboundary movement until it has received written confirmation that:

- (a) the notifier has received the written consent of the State of import; and
- (b) the notifier has received from the State of import confirmation of the existence of a contract between the exporter and the disposer specifying environmentally sound management of the wastes in question.

4. Each State of transit which is a Party shall promptly acknowledge to the notifier receipt of the notification. It may subsequently respond to the notifier in writing, within 60 days, consenting to the movement with or without conditions, denying permission for the movement, or requesting additional information. The State of export shall not allow the transboundary movement to commence until it has received the written consent of the State of transit. However, if at any time a Party decides not to require prior written consent, either generally or under specific conditions, for transit transboundary movements of hazardous wastes or other wastes, or modifies its requirements in this respect, it shall forthwith inform the other Parties of its decision pursuant to Article 13. In this latter case, if no response is received by the State of export within 60 days of the receipt of a given notification by the State of transit, the State of export may allow the export to proceed through the State of transit.

5. In the case of a transboundary movement of wastes where the wastes are legally defined as or considered to be hazardous wastes only:

- (a) by the State of export, the requirements of paragraph 9 of this Article that apply to the importer or disposer and the State of import shall apply *mutatis mutandis* to the exporter and State of export, respectively;
- (b) by the State of import, or by the States of import and transit which are Parties, the requirements of paragraphs 1, 3, 4 and 6 of this Article that apply to

the exporter and State of export shall apply *mutatis mutandis* to the importer or disposer and State of import, respectively; or

- (c) by any State of transit which is a Party, the provisions of paragraph 4 shall apply to such State.

6. The State of export may, subject to the written consent of the States concerned, allow the generator or the exporter to use a general notification where hazardous wastes or other wastes having the same physical and chemical characteristics are shipped regularly to the same disposer via the same customs office of exit of the State of export via the same customs office of entry of the State of import, and, in the case of transit, via the same customs office of entry and exit of the State or States of transit.

7. The States concerned may make their written consent to the use of the general notification referred to in paragraph 6 subject to the supply of certain information, such as the exact quantities or periodical lists of hazardous wastes or other wastes to be shipped.

8. The general notification and written consent referred to in paragraphs 6 and 7 may cover multiple shipments of hazardous wastes or other wastes during a maximum period of 12 months.

9. The Parties shall require that each person who takes charge of a transboundary movement of hazardous wastes or other wastes sign the movement document either upon delivery or receipt of the wastes in question. They shall also require that the disposer inform both the exporter and the competent authority of the State of export of receipt by the disposer of the wastes in question and, in due course, of the completion of disposal as specified in the notification. If no such information is received within the State of export, the competent authority of the State of export or the exporter shall so notify the State of import.

10. The notification and response required by this Article shall be transmitted to the competent authority of the Parties concerned or to such governmental authority as may be appropriate in the case of non-Parties.

11. Any transboundary movement of hazardous wastes or other wastes shall be covered by insurance, bond or other guarantee as may be required by the State of import or any State of transit which is a Party.

Article 7

Transboundary movement from a party through States which are not Parties

Article 6 (2) of the Convention shall apply *mutatis mutandis* to transboundary movement of hazardous wastes or other wastes from a Party through a State or States which are not parties.

Article 8

Duty to re-import

When a transboundary movement of hazardous wastes or other wastes to which the consent of the States concerned has been given, subject to the provisions of this Convention, cannot be completed in accordance with the terms of the contract, the State of export shall ensure that the wastes in question are taken back into the State of export, by the exporter, if alternative arrangements cannot be made for their disposal in an environmentally sound manner, within 90 days from the time that the importing State informed the State of export and the Secretariat, or such other period of time as the States concerned agree. To this end, the State of export and any Party of transit shall not oppose, hinder or prevent the return of those wastes to the State of export.

Article 9

Illegal traffic

1. For the purpose of this Convention, any transboundary movement of hazardous wastes or other wastes:

- without notification pursuant to the provisions of this Convention to all States concerned; or
- without the consent pursuant to the provisions of this Convention of a State concerned; or
- with consent obtained from States concerned through falsification, misrepresentation or fraud; or
- that does not conform in a material way with the documents; or
- that results in deliberate disposal (e.g. dumping) of hazardous wastes or other wastes in contravention of this Convention and of general principles of international law, shall be deemed to be illegal traffic.

2. In case of a transboundary movement of hazardous wastes or other wastes deemed to be illegal traffic as the result of conduct on the part of the exporter or generator, the State of export shall ensure that the wastes in question are:

- taken back by the exporter or the generator or, if necessary, by itself into the State of export; or, if impracticable,
- are otherwise disposed of in accordance with the provisions of this Convention, within 30 days from the time the State of export has been informed about the illegal traffic or such other period of time as States

concerned may agree. To this end the Parties concerned shall not oppose, hinder or prevent the return of those wastes to the State of export.

3. In the case of a transboundary movement of hazardous wastes or other wastes deemed to be illegal traffic as the result of conduct on the part of the importer or disposer, the State of import shall ensure that the wastes in question are disposed of in an environmentally sound manner by the importer or disposer or, if necessary, by itself within 30 days from the time the illegal traffic has come to the attention of the State of import or such other period of time as the States concerned may agree. To this end, the Parties concerned shall cooperate, as necessary, in the disposal of the wastes in an environmentally sound manner.

4. In cases where the responsibility for the illegal traffic cannot be assigned either to the exporter or generator or to the importer or disposer, the Parties concerned or other Parties, as appropriate, shall ensure, through cooperation, that the wastes in question are disposed of as soon as possible in an environmentally sound manner either in the State of export or the State of import or elsewhere as appropriate.

5. Each Party shall introduce appropriate national/domestic legislation to prevent and punish illegal traffic. The Parties shall cooperate with a view to achieving the objects of this Article.

Article 10

International cooperation

1. The Parties shall cooperate with each other in order to improve and achieve environmentally sound management of hazardous wastes and other wastes.

2. To this end, the Parties shall:

- upon request, make available information, whether on a bilateral or multilateral basis, with a view to promoting the environmentally sound management of hazardous wastes and other wastes, including harmonization of technical standards and practices for the adequate management of hazardous wastes and other wastes;
- cooperate in monitoring the effects of the management of hazardous wastes on human health and the environment;
- cooperate, subject to their national laws, regulations and policies, in the development and implementation of new environmentally sound low-waste technologies and the improvement of existing technologies with a view to eliminating, as far as practicable, the generation of hazardous wastes and other wastes and achieving more effective and efficient methods of ensuring their management in an environmentally sound manner, including the study of the economic, social and environmental effects of the adoption of such new or improved technologies;

(d) cooperate actively, subject to their national laws, regulations and policies, in the transfer of technology and management systems related to the environmentally sound management of hazardous wastes and other wastes. They shall also cooperate in developing the technical capacity among Parties, especially those which may need and request technical assistance in this field;

(e) cooperate in developing appropriate technical guidelines and/or codes of practice.

3. The Parties shall employ appropriate means to cooperate in order to assist developing countries in the implementation of subparagraphs (a) to (d) of Article 4 (2).

4. Taking into account the needs of developing countries, cooperation between Parties and the competent international organizations is encouraged to promote, *inter alia*, public awareness, the development of sound management of hazardous wastes and other wastes and the adoption of new low-waste technologies.

Article 11

Bilateral, multilateral and regional agreements

1. Notwithstanding the provisions of Article 4 (5), Parties may enter into bilateral, multilateral, or regional agreements or arrangements regarding transboundary movement of hazardous wastes or other wastes with Parties or non-parties provided that such agreements or arrangements do not derogate from the environmentally sound management of hazardous wastes and other wastes as required by this Convention. These agreements or arrangements shall stipulate provisions which are not less environmentally sound than those provided for by this Convention in particular taking into account the interests of developing countries.

2. Parties shall notify the Secretariat of any bilateral, multilateral or regional agreements or arrangements referred to in paragraph 1 and those which they have entered into prior to the entry into force of this Convention for them, for the purpose of controlling transboundary movements of hazardous wastes and other wastes which take place entirely among the Parties to such agreements. The provisions of this Convention shall not affect transboundary movements which take place pursuant to such agreements provided that such agreements are compatible with the environmentally sound management of hazardous wastes and other wastes as required by this Convention.

Article 12

Consultations on liability

The Parties shall cooperate with a view to adopting, as soon as practicable, a protocol setting out appropriate

rules and procedures in the field of liability and compensation for damage resulting from the transboundary movement and disposal of hazardous wastes and other wastes.

Article 13

Transmission of information

1. The Parties shall, whenever it comes to their knowledge, ensure that, in the case of an accident occurring during the transboundary movement of hazardous wastes or other wastes or their disposal, which are likely to present risks to human health and the environment in other States, those States are immediately informed.

2. The Parties shall inform each other, through the Secretariat, of:

- (a) changes regarding the designation of competent authorities and/or focal points, pursuant to Article 5;
- (b) changes in their national definition of hazardous wastes, pursuant to Article 3;

- (i) such other matters as the Conference of the Parties shall deem relevant.

4. The Parties, consistent with national laws and regulations, shall ensure that copies of each notification concerning any given transboundary movement of hazardous wastes or other wastes, and the response to it, are sent to the Secretariat when a Party considers that its environment may be affected by that transboundary movement has requested that this should be done.

Article 14

Financial aspects

1. The Parties agree that, according to the specific needs of different regions and subregions, regional or subregional centres for training and technology transfers regarding the management of hazardous wastes and other wastes and the minimization of their generation should be established. The Parties shall decide on the establishment of appropriate funding mechanisms of a voluntary nature.

2. The Parties shall consider the establishment of a revolving fund to assist on an interim basis in case of emergency situations to minimize damage from accidents arising from transboundary movements of hazardous wastes and other wastes or during the disposal of those wastes.

- (d) consider and adopt protocols as required; and
- (e) establish such subsidiary bodies as are deemed necessary for the implementation of this Convention.

6. The United Nations, its specialized agencies, as well as any State not party to this Convention, may be represented as observers at meetings of the Conference of the Parties. Any other body or agency, whether national or international, governmental or non-governmental, qualified in fields relating to hazardous wastes or other wastes which has informed the Secretariat of its wish to be represented as an observer at a meeting of the Conference of the Parties, may be admitted unless at least one-third of the Parties present object. The admission and participation of observers shall be subject to the rules of procedure adopted by the Conference of the Parties.

7. The Conference of the Parties shall undertake three years after the entry into force of this Convention, and at

 - the monitoring of hazardous wastes and other wastes, and
 - emergency responses;
- (h) to provide Parties, upon request, with information on consultants or consulting firms having the necessary technical competence in the field, which can assist them to examine a notification for a transboundary movement, the concurrence of a shipment of hazardous wastes or other wastes with the relevant notification, and/or the fact that the proposed disposal facilities for hazardous wastes or other wastes are environmentally sound, when they have reason to believe that the wastes in question will not be managed in an environmentally sound manner. Any such examination would not be at the expense of the Secretariat;
- (i) to assist Parties upon request in their identification of cases of illegal traffic and to circulate immediately to the Parties concerned any information it has received regarding illegal traffic;
- (j) to cooperate with Parties and with relevant and competent international organizations and agencies in the provision of experts and equipment for the purpose of rapid assistance to States in the event of an emergency situation; and
- (k) to perform such other functions relevant to the purposes of this Convention as may be determined by the Conference of the Parties.

2. The secretariat functions will be carried out on an interim basis by UNEP until the completion of the first meeting of the Conference of the Parties held pursuant to Article 15.

3. At its first meeting, the Conference of the Parties shall designate the Secretariat from among those existing competent intergovernmental organizations which have signified their willingness to carry out the secretariat functions under this Convention. At this meeting, the Conference of the Parties shall also evaluate the implementation by the interim Secretariat of the functions assigned to it, in particular under paragraph 1, and decide upon the structures appropriate for those functions.

Article 17

Amendment of the Convention

1. Any Party may propose amendments to this Convention and any Party to a Protocol may propose amendments to that Protocol. Such amendments shall take due account, *inter alia*, of relevant scientific and technical considerations.
2. Amendments to this Convention shall be adopted at a meeting of the Conference of the Parties. Amendments to any Protocol shall be adopted at a meeting of the Parties to the Protocol in question. The text of any proposed amendment to this Convention or to any Protocol, except

as may otherwise be provided in such Protocol, shall be communicated to the Parties by the Secretariat at least six months before the meeting at which it is proposed for adoption. The Secretariat shall also communicate proposed amendments to the Signatories to this Convention for information.

3. The Parties shall make every effort to reach agreement on any proposed amendment to this Convention by consensus. If all efforts at consensus have been exhausted, and no agreement reached, the amendment shall as a last resort be adopted by a three-fourths majority vote of the Parties present and voting at the meeting, and shall be submitted by the Depositary to all Parties for ratification, approval, formal confirmation or acceptance.

4. The procedure mentioned in paragraph 3 above shall apply to amendments to any Protocol, except that a two-thirds majority of the Parties to that Protocol present and voting at the meeting shall suffice for their adoption.

5. Instruments of ratification, approval, formal confirmation or acceptance of amendments shall be deposited with the Depositary. Amendments adopted in accordance with paragraphs 3 or 4 above shall enter into force between Parties having accepted them on the 90th day after the receipt by the Depositary of their instrument of ratification, approval, formal confirmation or acceptance by at least three-fourths of the Parties who accepted the amendments to the Protocol concerned, except as may otherwise be provided in such Protocol. The amendments shall enter into force for any other Party on the 90th day after that Party deposits its instrument of ratification, approval, formal confirmation or acceptance of the amendments.

6. For the purpose of this Article, 'Parties present and voting' means Parties present and casting an affirmative or negative vote.

Article 18

Adoption and amendment of Annexes

1. The Annexes to this Convention or to any Protocol shall form an integral part of this Convention or of such Protocol, as the case may be and, unless expressly provided otherwise, a reference to this Convention or its Protocols constitutes at the same time a reference to any Annexes thereto. Such Annexes shall be restricted to scientific, technical and administrative matters.

2. Except as may be otherwise provided in any protocol with respect to its Annexes, the following procedure shall apply to the proposal, adoption and entry into force of additional Annexes to this Convention or of Annexes to a protocol:

- (a) Annexes to this Convention and its Protocols shall be proposed and adopted according to the procedure laid down in Article 17 (2), (3) and (4);
- (b) any Party that is unable to accept an additional Annex to this Convention or an Annex to any Protocol to

which it is party shall so notify the Depositary, in writing, within six months from the date of the communication of the adoption by the Depositary. The Depositary shall without delay notify all Parties of any such notification received. A Party may at any time substitute an acceptance for a previous declaration of objection and the Annexes shall thereupon enter into force for that Party;

- (c) on the expiry of six months from the date of the circulation of the communication by the Depositary, the Annex shall become effective for all Parties to this Convention or to any Protocol concerned, which have not submitted a notification in accordance with the provision of subparagraph (b).

3. The proposal, adoption and entry into force of amendments to Annexes to this Convention or to any Protocol shall be subject to the same procedure as for the proposal, adoption and entry into force of Annexes to the Convention or Annexes to a Protocol. Annexes and amendments thereto shall take due account, *inter alia*, of relevant scientific and technical considerations.

4. If an additional Annex or an amendment to an Annex involves an amendment to this Convention or to any Protocol, the additional Annex or amended Annex shall not enter into force until such time as the amendment to this Convention or to the Protocol enters into force.

Article 19

Verification

Any Party which has reason to believe that another Party is acting or has acted in breach of its obligations under this Convention may inform the Secretariat thereof, and in such an event, shall simultaneously and immediately inform, directly or through the Secretariat, the Party against whom the allegations are made. All relevant information should be submitted by the Secretariat to the Parties.

Article 20

Settlement of disputes

1. In case of a dispute between Parties as to the interpretation or application of, or compliance with, this Convention or any Protocol thereto, they shall seek a settlement of the dispute through negotiation or any other peaceful means of their own choice.

2. If the Parties concerned cannot settle their dispute through the means mentioned in the preceding paragraph, the dispute, if the parties to the dispute agree, shall be submitted to the International Court of Justice or to arbitration under the conditions set out in Annex VI on arbitration. However, failure to reach common agreement on submission of the dispute to the International Court of

Justice or to arbitration shall not absolve the Parties from the responsibility of continuing to seek to resolve it by the means referred to in paragraph 1.

3. When ratifying, accepting, approving, formally confirming or acceding to this Convention, or at any time thereafter, a State or political and/or economic integration organization may declare that it recognizes as compulsory *ipso facto* and without special agreement, in relation to any Party accepting the same obligation:

- (a) submission of the dispute to the International Court of Justice; and/or
(b) arbitration in accordance with the procedures set out in Annex VI.

Such declaration shall be notified in writing to the Secretariat which shall communicate it to the Parties.

2. Any organization referred to in paragraph 1 above which becomes a Party to this Convention without any of its member States being a Party shall be bound by all the obligations under the Convention. In the case of such organizations, one or more of whose member States is a Party to the Convention, the organization and its member States shall decide on their respective responsibilities for the performance of their obligations under the Convention. In such cases, the organization and the member States shall not be entitled to exercise rights under the Convention concurrently.

3. In their instruments of formal confirmation or approval, the organizations referred to in paragraph 1 above shall declare the extent of their competence with

respect to the matters governed by the Convention. These organizations shall also inform the Depositary, who will inform the Parties of any substantial modification in the extent of their competence.

Article 23

Accession

1. This Convention shall be open for accession by States, by Namibia, represented by the United Nations Council for Namibia, and by political and/or economic integration organizations from the day after the date on which the Convention is closed for signature. The instruments of accession shall be deposited with the Depositary.

2. In their instruments of accession, the organizations referred to in paragraph 1 shall declare the extent of their competence with respect to the matters governed by the Convention. These organizations shall also inform the Depositary of any substantial modification in the extent of their competence.

3. The provisions of Article 22 (2) shall apply to political and/or economic integration organizations which accede to this Convention.

Article 24

Right to vote

1. Except as provided for in paragraph 2 each Contracting Party to this Convention shall have one vote.

2. Political and/or economic integration organizations, in matters within their competence, in accordance with Articles 22 (3) and 23 (2) shall exercise their right to vote with a number of votes equal to the number of their member States which are Parties to the Convention or the relevant Protocol. Such organizations shall not exercise their right to vote if their member States exercise theirs, and *vice versa*.

Article 25

Entry into force

1. This Convention shall enter into force on the 90th day after the date of deposit of the 20th instrument of ratification, acceptance, formal confirmation, approval or accession.

2. For each State or political and/or economic integration organization which ratifies, accepts, approves or formally confirms this Convention or accedes thereto after the date of the deposit of the 20th instrument of ratification, acceptance, approval, formal confirmation or accession, it shall enter into force on the 19th day after the date of deposit by such State or political and/or economic integration organization of its instrument of ratification, acceptance, approval, formal confirmation or accession.

3. For the purposes of paragraphs 1 and 2, any instrument deposited by a political and/or economic integration organization shall not be counted as additional to those deposited by member States of such organization.

Article 26

Reservations and declarations

1. No reservation or exception may be made to this Convention.

2. Paragraph 1 of this Article does not preclude a State or political and/or economic integration organization, when signing, ratifying, accepting, approving, formally confirming or acceding to this Convention, from making declarations or statements, however phrased or named, with a view, *inter alia*, to the harmonization of its law and regulations with the provisions of this Convention, provided that such declarations or statements do not purport to exclude or to modify the legal effects of the provisions of the Convention in their application to that State.

Article 27

Withdrawal

1. At any time after three years from the date on which this Convention has entered into force for a Party, that Party may withdraw from the Convention by giving written notification to the Depositary.

ANNEX III

LIST OF HAZARDOUS CHARACTERISTICS

UN class (*)	Code	Characteristics
1	H1	<p><i>Explosive</i></p> <p>An explosive substance or waste is a solid or liquid substance or waste (or mixture of substances or wastes) which is in itself capable by chemical reaction of producing gas at such a temperature and pressure and at such a speed as to cause damage to the surroundings.</p>
3	H3	<p><i>Flammable liquids</i></p> <p>The word 'flammable' has the same meaning as 'inflammable'. Flammable liquids are liquids, or mixtures of liquids, or liquids containing solids in solution or suspension (for example, paints, varnishes, lacquers, etc., but not including substances or wastes otherwise classified on account of their dangerous characteristics) which give off a flammable vapour at temperatures of not more than 60,5 °C, closed-cup test, or not more than 65,6 °C, open-cup test. (Since the results of open-cup tests and of closed-cup tests are not strictly comparable and even individual results by the same test are often variable, regulations varying from the above figures to make allowance for such differences would be within the spirit of this definition.).</p>
4.1	H4.1	<p><i>Flammable solids</i></p> <p>Solids, or waste solids, other than those classed as explosives, which under conditions encountered in transport are readily combustible, or may cause or contribute to fire through friction.</p>
4.2	H4.2	<p><i>Substances or wastes liable to spontaneous combustion</i></p> <p>Substances or wastes which are liable to spontaneous heating under normal conditions encountered in transport, or to heating up on contact with air, and being then liable to catch fire.</p>

UN class (*)	Code	Characteristics
4.3	H4.3	Substances or wastes which, in contact with water emit flammable gases Substances or wastes which, by interaction with water, are liable to become spontaneously flammable or to give off flammable gases in dangerous quantities.
5.1	H5.1	<i>Oxidizing</i> Substances or wastes which, while in themselves not necessarily combustible, may, generally by yielding oxygen cause, or contribute to, the combustion of other materials.
5.2	H5.2	<i>Organic peroxides</i> Organic substances or wastes which contain the bivalent -O-O-structure are thermally unstable substances which may undergo exothermic self-accelerating decomposition.
6.1	H6.1	<i>Poisonous (acute)</i> Substances or wastes liable either to cause death or serious injury or to harm human health if swallowed or inhaled or by skin contact.
6.2	H6.2	<i>Infectious substances</i> Substances or wastes containing viable micro-organisms or their toxins which are known or suspected to cause disease in animals or humans.
8	H8	<i>Corrosives</i> Substances or wastes which, by chemical action, will cause severe damage when in contact with living tissue, or, in the case of leakage, will materially damage, or even destroy, other goods or the means of transport; they may also cause other hazards.
9	H10	<i>Liberation of toxic gases in contact with air or water</i> Substances or wastes which, by interaction with air or water, are liable to give off toxic gases in dangerous quantities.
9	H11	<i>Toxic (delayed or chronic)</i> Substances or wastes which, if they are inhaled or ingested or if they penetrate the skin, may involve delayed or chronic effects, including carcinogenicity.
9	H12	<i>Ecotoxic</i> Substances or wastes which if released present or may present immediate or delayed adverse impacts to the environment by means of bioaccumulation and/or toxic effects upon biotic systems.
9	H13	Capable, by any means, after disposal, of yielding another material, e.g., leachate, which possesses any of the characteristics listed above.

(*) Corresponds to the hazard classification system included in the United Nations recommendations on the transport of dangerous goods (ST/SG/AC. 10/1/Rev. 5, United Nations, New York, 1988).

Tests

The potential hazards posed by certain types of wastes are not yet fully documented; tests to define quantitatively these hazards do not exist. Further research is necessary in order to develop means to characterize potential hazards posed to man and/or the environment by these wastes. Standardized tests have been derived with respect to pure substances and materials. Many countries have developed national tests which can be applied to materials listed in Annex I, in order to decide if these materials exhibit any of the characteristics listed in this Annex.

2. If one of the Parties to the dispute does not appoint an arbitrator within two months of the receipt of the request, the other Party may inform the Secretary-General of the United Nations who shall designate the chairman of the arbitral tribunal within a further two months' period. Any dispute which may arise between the Parties concerning the interpretation or execution of the award may be submitted by either party to the arbitral tribunal which made the award or, if the latter cannot be seized thereof, to another tribunal constituted for this purpose in the same manner as the first.

BASELSKA KONVENCIJA O NADZORU PREHOĐA NEVARNIH ODPADKOV PREKO MEJA IN NJIHOVEGA ODSTRANJEVANJA

UVOD

Udeleženke te konvencije,

ki se zavedajo nevarnosti za človekovo zdravje in okolje, ki jo povzročajo nevarni odpadki in drugi odpadki in njihov prehod preko meja,

pozorne na rastočo nevarnost za človekovo zdravje in za okolje, ki jo povzročajo povečano proizvajanje in raznovrstnost ter prehod nevarnih odpadkov in drugih odpadkov preko meja,

ki se zavedajo tudi, da je najučinkovitejši način varstva človekovega zdravja in okolja pred nevarnostmi, ki jih povzročajo takšni odpadki, zmanjšanje njihovega proizvajanja na minimum glede količine in glede njihove nevarnosti, prepričane, da bi morale države ustrezno ukrepati, da bi bilo ravnanje z nevarnimi odpadki in z drugimi odpadki, vključno z njihovim prehodom preko meja in odstranjevanjem, skladno z varstvom človekovega zdravja in okolja, ne glede na kraj njihovega odstranjevanja,

opozarjajo, da bi morale države zagotoviti, da bi proizvajalec izpolnil svoje dolžnosti glede na prevoz in odstranjevanje nevarnih odpadkov in drugih odpadkov na način, ki je skladen z varstvom okolja ne glede na kraj odstranjevanja,

v celoti priznavajo, da ima katerakoli država suvereno pravico, da prepreči vstop ali odstranjevanje tujih nevarnih in drugih odpadkov na svojem ozemlju,

priznavajo tudi naraščajoč zahtevo po prepovedi prehoda nevarnih odpadkov preko meja in njihovega odstranjanja v drugih državah, posebno v državah v razvoju,

prepričane, da bi morali nevarne odpadke in druge odpadke, če je to skladno z okolju varnim in učinkovitim ravnanjem, odstranjevati v državi, kjer so bili proizvedeni,

zavedajo se tudi, da bi moral biti prehod takšnih odpadkov preko meja in države proizvajalke v katerokoli drugo državo dovoljen samo, če bi bil izpeljan pod pogoji, ki ne ogrožajo človekovega zdravja in okolja, ter po pogojih, skladnih z določili te konvencije,

upoštevajo, da bo povečani nadzor prehoda nevarnih odpadkov in drugih odpadkov preko meja deloval kot spodbuda za okolju varno ravnanje z njimi in za zmanjšanje obsega takšnega prehoda preko meja,

Če je potrebno, morajo prizadete strani v ta namen sodelovati pri odstranjevanju odpadkov na okolju varen način.

4. Kadar odgovornosti za nezakonit promet ni mogoče pripisati niti izvozniku, niti proizvajalcu, niti uvozniku, niti odstranjevalcu, morajo prizadete države udeleženke ali druge države udeleženke, kot je ustrezno, zagotoviti s sodelovanjem, da se odpadki odstranijo čim prej in na okolju varen način, bodisi v državi izvoznici ali državi uvoznici ali drugod, kot je ustrezno.

SEZNAM LASTNOSTI NEVARNIH SNOVI

ZN razred*	Oznaka	Lastnosti
1	H1	Eksploziv Eksplozivna snov, ali odpadek je trdna ali tekoča snov ali odpadek (ali mešanica snovi ali odpadkov), ki je sama po sebi zmožna s kemično reakcijo proizvesti plin pri takšni temperaturi in tlaku in s takšno hitrostjo, da povzroči škodo okolici.
3	H3	Vnetljive tekočine Beseda »vnetljiv« ima enak pomen kot »gorljiv«. Vnetljive tekočine so tekočine ali mešanice tekočin ali tekočine, ki vsebujejo trdne delce v raztopini ali suspenziji (na primer barye, premazi, laki itd., vendar ne vključujejo snovi ali odpadkov, sicer klasificiranih zaradi nevarnih lastnosti), ki oddajajo gorljive hlape pri temperaturah, ne višjih od 60,5°C pri testiranju v zaprti posodi ali ne višjih od 65,6°C pri testiranju v odprtvi posodi. (Zaradi tega, ker rezultati testiranj v odprtvi in v zaprti posodi niso natančno primerljivi in so celo posamezni rezultati pri istem testu pogosto spremenljivi, bi bili predpisi, ki se razlikujejo od zgornjih števil koliko, da dopuščajo takšne razlike, v skladu s to definicijo.)
4.1	H4.1	Vnetljive trdne snovi Trdne snovi ali trdni odpadki, ki niso klasificirani kot eksplozivni, ki so v razmerah, v katerih se znajdejo med prevozom, hitro vnetljivi in lahko povzročajo ali pripomorejo k požaru zaradi trenja.
4.2	H4.2	Snovi in odpadki, ki se lahko sami vnamejo Snovi ali odpadki, ki se zaradi spontanega gretja pod normalnimi pogoji, v katerih se znajdejo med prevozom, ali segretja pri stiku z zrakom lahko vnamejo.
4.3	H4.3	Snovi in odpadki, ki v stiku z vodo povzročijo nastanek vnetljivih plinov Snovi ali odpadki, ki zaradi medsebojne reakcije z vodo lahko postanejo samovnetljivi ali oddajajo vnetljive pline v nevarnih količinah.
5.1	H5.1	Oksidacijske snovi Snovi in odpadki, ki sami po sebi niso vnetljivi, lahko na splošno zaradi oddajanja kisika povzročijo ali pripomorejo k vnetju drugih materialov.
5.2	H5.2	Organski peroksidi Organske snovi ali odpadki, ki vsebujejo dvojno –O–O– vez, so topotno nestabilne snovi, ki se lahko same razkrojijo.
6.1	H6.1	Strupeni (akutni) Snovi ali odpadki, ki lahko bodisi povzročijo smrt ali resno poškodbo ali škodujejo človekovemu zdravju, če jih zaužijemo ali vdihavamo ali z dotikom kože.
6.2	H6.2	Kužne snovi Snovi ali odpadki, ki vsebujejo žive mikroorganizme ali njihove toksine, za katere se ve ali sumi, da povzročajo bolezni pri živalih in ljudeh.
8	H8	Jedke Snovi ali odpadki, ki zaradi kemične reakcije povzročajo močne poškodbe, kadar so v stiku z živim tkivom, ali pri puščanju materialno poškodujejo ali celo uničijo drugo blago ali prevozna sredstva; lahko tudi povzročijo druge nevarnosti.

* Ustreza klasifikacijskemu sistemu nevarnosti, vključenemu v priporočila Združbenih narodov o prevozu nevarnih snovi (ST/SG/AC.10/1/Rev.5, Združeni narodi, New York, 1988).

ZN razred*	Oznaka	Lastnosti
9	H10	Sproščanje strupenih plinov v stiku z zrakom ali vodo Snovi ali odpadki, ki z medsebojno reakcijo z zrakom ali vodo lahko oddajajo strupene pline v nevarnih količinah.
9	H11	Strupene (s kasnejšim delovanjem) Snovi ali odpadki, če se vdihavajo ali zaužijejo ali če prodrejo skozi kožo, lahko povzročijo zapozne ali kronične posledice, vključno kancerogenost.
9	H12	Ekotoksične Snovi ali odpadki, ki takrat, ko so razsuti, povzročajo ali lahko povzročijo takojšnje ali zapozne škodljive vplive na okolje zaradi bioakumulacije in/ali toksičnih učinkov na žive sisteme.
9	H13	Sposobne, da s kakršnimkoli sredstvi po odstranjenju tvorijo drugo snov, npr. lug, ki ima katerokoli lastnost, navedeno zgoraj..

TESTI

Potencialne nevarnosti, ki jih povzročajo določene vrste odpadkov, še niso v celoti dokumentirane; testov, ki bi količinsko opredelili te nevarnosti, ni. Potrebne so nadaljnje raziskave, da bi razvili metode za določanje možnih nevarnosti za človeka in/ali za okolje zaradi teh odpadkov. Standardizirani testi so bili narejeni s čistimi snovmi in materiali. Mnoge države so razvile državne teste, ki se lahko uporabljajo za materiale, navedene v I. dodatku, da se določi, ali ti materiali kažejo katerokoli lastnost, navedeno v tem dodatku.

VI. DODATEK

ARBITRAŽA

1. člen

Če sporazum, naveden v 20. členu te konvencije, ne predvideva drugače, arbitražni postopek poteka v skladu z 2. do 10. členom.

2. člen

Tožeča stranka mora obvestiti sekretariat, da sta se stranki dogovorili, da predata spor v arbitražo skladno z 2. ali 3. odstavkom 20. člena in vključita posebej tiste člene konvencije, katerih razлага ali veljavnost sta sporni. Sekretariat mora tako prejete informacije poslati vsem udeleženkam v konvenciji.

3. člen

Arbitražno razsodišče sestavljajo trije člani. Vsaka stranka v sporu imenuje enega razsodnika in oba tako imenovana razsodnika medsebojno sporazumno določita tretjega razsodnika, ki bo predsednik razsodišča. Slednji ne sme biti državljan nobene od strank v sporu niti ne sme imeti stalnega bivališča na ozemlju katere od strank ali biti zaposlen od katerekoli od njiju ali se ukvarjati s primerom v neki drugi pristojnosti.

4. člen

1. Če predsednik arbitražnega razsodišča ni bil določen v dveh mesecih po imenovanju drugega razsodnika, ga generalni sekretar Združenih narodov na zahtevo ene od strank določi v naslednjih dveh mesecih.

5. člen

1. Arbitražno razsodišče mora sprejeti svoj sklep v skladu z mednarodnim zakonom in v skladu z določili te konvencije.

2. Arbitražno razsodišče, postavljeno po določilih tega dodatka; mora sestaviti svoj lastni pravilnik.

6. člen

1. O postopku in vsebini odloča arbitražno sodišče z večinskim sklepom svojih članov.

2. Sodišče lahko sprejme vse ukrepe, ki so potrebni za ugotovitev dejstev. ~~in~~ prošnjo ene od strank lahko sodišče priporoči bistvene začasne varnostne ukrepe.

3. Stranke, udeleženke v sporu, ustvarjajo vse pogoje za učinkovito izpeljavo postopka.

4. Če se stranka ne udeleži spora ali pa ne pride pravočasno, to ni ovira za nadaljevanje postopka.

7. člen

Sodišče lahko o protitožbah, ki so neposredno povezane s predmetom spora, sodniško odloča.

8. člen

Če zaradi posebnih okoliščin arbitražno sodišče ne odloči drugače, krijejo stranke sodne stroške, vključno s plačilom za člane, v enaki višini. Sodišče zabeleži vse izdatke in strankam predloži dokončni pregled stroškov.

9. člen

Vsaka pogodbenica, ki ima zakonit interes za predmet sporja, ki bi ga lahko zmanjšala razsodba arbitražnega sodišča, se lahko s privolitvijo sodišča vključi v postopek.

10. člen

1. Sodišče razsodi v petih mesecih po svoji postavivti
če meni, da je treba rok podaljšati, slednji ne sme
presegati nadaljnjih pet mesecov.

2. Razsodba arbitražnega sodišča mora biti obrazlo-
žena. Ta razsodba je dokončna in zavezujoča za stranke.

3. Vsak spor, ki bi lahko nastal zaradi razlage ali
izvršitve razsodbe, lahko katerakoli stranka predloži arbi-
tražnemu sodišču, ki je razsodilo, ali, če se na to sodišče
ni možno obrniti, drugemu sodišču, ki je bilo za ta namen
postavljeno na enak način kot prvo.
