1.	MMDS / BSS	- Satelitski sprejem je zaščiten v smereh sprejema satelita v skladu z ITU pravilnikom o radijskih komunikacijah 2012 (Radio Regulations; v nadaljevanju ITU RR), AP30, aneks 3, poglavje 2; - Največja dovoljena vrednost PFD zaradi oddajanja signala MMDS, oziroma BWA, na meji Republike Slovenije ne sme biti presežena v skladu z ITU RR - AP30; - vrednost neželenih oddajanj (ang. spurious emission) mora ustrezati priporočilu ERC 74-01 (aneks 1, tabela 1.1, točka 1.1), vrednost sevanj izven kanala (ang. Out-of-band emissions) pa priporočilu ECC/REC (02)05; - V ostalih smereh je največja dovoljena vrednost PFD izven separacijske razdalje enaka - 84 dB(W/(m² x 27 MHz)), znotraj separacijske razdalje pa je ta vrednost lahko presežena. Separacijska razdalja je odvisna od višine oddajne antene sistema MMDS oziroma BWA skupaj z nadmorsko višino in glede na EIRP oddajnika. Največja dovoljena vrednost EIRP je 35 dBm. Znotraj separacijske razdalje sme biti zelo malo satelitskih sprejemnikov oziroma potencialnih uporabnikov satelitskega sprejema. Tem uporabnikom je potrebno zagotoviti nemoten satelitski sprejem.	- Satellite reception is protected in direction of satellite reception in accordance with Radio Regulations; ITU RR), AP30, Annex 3, Chapter 2; - The maximum permissible PFD value of MMDS and BWA signal on the border of the Republic of Slovenia should not be exceeded in accordance with limits defined in ITU RR - AP30; - The limits for spurious emission levels are defined in ERC/REC 74-01 (Annex1, Table 1.1, Section 1.1, limits for Out-of-band emissions level are defined in ECC/REC(02)05 - In other directions maximum PFD value should be less or equal than - 84 dB (W / (m² x 27 MHz)) outside the separation distance, within separation distance this value may be exceeded. Separation distance varies depends on the height above sea level added to antenna height of MMDS or BWA transmitter and on the transmitted EIRP. Maximum allowed EIRP value is 35 dBm. Within the separation distance only a very limited number of satellite receivers or potential users of satellite reception is allowed, and for all these satellite receivers it is necessary to ensure satellite reception using mitigation techniques.
