INSTRUCTION FOR USE

- (a) FCL.050 requires holders of a pilot licence to record details of all flights flown. This logbook enables pilot licence holders to record flying experience in a manner which will facilitate this process while providing a permanent record of the licence holders flying. Pilots who fly regularly aeroplanes and helicopters or other aircraft categories are recommended to maintain separate logbooks for each aircraft category.
- (b) Flight crew logbook entries should be made as soon as practicable after any flight undertaken. All entries in the logbook should be made in ink or indelible pencil.
- (c) The particulars of every flight in the course of which the holder of a flight crew licence acts as a member of the operating crew of an aircraft are to be recorded in the appropriate columns using one line for each flight, provided that if an aircraft carries out a number of flights on the same day returning on each occasion to the same place of departure and the interval between successive flights does not exceed 30 minutes, such series of flights may be recorded as a single entry.
- (d) Flight time is recorded:
- (1) for aeroplanes, touring motor gliders and powered-lift aircraft, from the moment an aircraft first moves to taking off until the moment it finally comes to rest at the end of the flight;
 - (2) for helicopters, from the moment a helicopter's rotor blades start turning until the moment the helicopter finally comes to rest at the end of the flight, and the rotor blades are stopped;
 - (3) for airships, from the moment an airship is released from the mast to taking off until the moment the airship finally comes to rest at the end of the flight, and is secured on the mast;
 - (4) flight time under Instrument Flight Rules (IFR) means all flight time during which the aircraft is being operated under the Instrument Flight Rules.
- (e) When an aircraft carries two or more pilots as members of the operating crew, one of them shall, before the flight commences, be designated by the operator as the aircraft PIC, according to operational requirements, who may delegate the conduct of the flight to another suitably qualified pilot. All flying carried out as PIC is entered in the logbook as 'PIC'. A pilot flying as 'PICUS' or 'SPIC' enters flying time as 'PIC' but all such entries are to be certified by the PIC or FI in the 'Remarks' column of the logbook.
- (f) Notes on recording of flight time:
 COLUMN 1: enter the date (dd/mm/yy) on which the flight commences;
 COLUMN 2 and 3: enter the place of departure and destination either in full or the internationally recognised three or four letter designator. All times should be in UTC;
 COLUMN 5: enter the name(s) of PIC or SELF if you are a PIC – see also item (i);
 COLUMN 6: indicate whether the operation was SP or MP, and for SP operation whether SE or ME;
 COLUMN 7: total time of flight may be entered in hours and minutes or decimal notation as desired;
 COLUMN 8: indicate the number of landings as pilot flying by day or night;
 COLUMN 9: enter flight time undertaken at day, at night or under IFR, if applicable. If a flight has been fully or partially carried out at night under IFR, the flight shall be entered in both columns; night and IFR;
 COLUMN 10: pilot function time:
 – enter flight time as PIC, SPIC and PICUS as PIC;
 – all time recorded as SPIC or PICUS is countersigned by the aircraft PIC/FI in the 'remarks' (column 12);
 – instructor time should be recorded as appropriate and also entered as PIC;
 COLUMN 11: FSTD:
 – for any FSTD enter the type of aircraft and qualification number of the device. For other flight training devices enter either FNPT I or FNPT II as appropriate;
 – total time of session includes all exercises carried out in the device, including pre- and after-flight checks;
 – enter the type of exercise performed in the 'remarks' (column 12), for example: operator proficiency check, revalidation, etc.
 COLUMN 12: the 'remarks' column may be used to record details of the flight at the holder's discretion. The following entries, however, should always be made:
 – instrument flight time undertaken as part of the training for a licence or rating;
 – details of all skill tests, proficiency checks and assessments of competence;
 – signature of PIC if the pilot is recording flight time as SPIC or PICUS;
 – signature of instructor if flight is part of an SEP or TMG class rating revalidation.
- (g) When each page is completed, accumulated flight time or hours should be entered in the appropriate columns and certified by the pilot in the 'remarks' column.
- LOGGING OF TIMES – see the examples at the end of the pilot's logbook
- (h) If the holder of a licence carries out a number of flights on the same day returning on each occasion to the same place of departure and the interval between successive flights does not exceed 30 minutes, such series of flights may be recorded as a single entry.

- (i) Logging of PIC flight time:
 - (1) the holder of a licence may log as PIC time all of the flight time during which he or she is the PIC;
 - (2) the applicant for or the holder of a pilot licence may log as PIC time all solo flight time, flight time as SPIC and flight time under supervision provided that such SPIC time and flight time under supervision are countersigned by the instructor;
 - (3) the holder of an instructor certificate may log as PIC all flight time during which he or she acts as an instructor in an aircraft;
 - (4) the holder of an examiner's certificate may log as PIC all flight time during which he or she occupies a pilot's seat and acts as an examiner in an aircraft;
 - (5) a co-pilot acting as PICUS on an aircraft on which more than one pilot is required under the type certification of the aircraft or as required by operational requirements provided that such PICUS time is countersigned by the PIC.
- (j) Logging CO-PILOT flight time: the holder of a pilot licence occupying a pilot seat as co-pilot may log all flight time as co-pilot flight time on an aircraft on which more than one pilot is required;
- (k) Logging instruction time: a summary of all time logged by an applicant for a licence or rating as flight instruction, instrument flight instruction, instrument ground time, etc., may be logged if certified by the appropriately rated or authorised instructor from whom it was received.
- (l) Logging PICUS flight time: provided that the method of supervision is acceptable to the competent authority, a co-pilot may log as PIC flight time flown as PICUS when all the duties and functions of PIC on that flight were carried out in such a way that the intervention of the PIC in the interest of safety was not required.
